

Name: _____ Date: _____

Draw a Picture of the two environment of igneous rock formation. Label the process of cooling (Fast, Slow)
Explain the how the process cooling result in the texture.

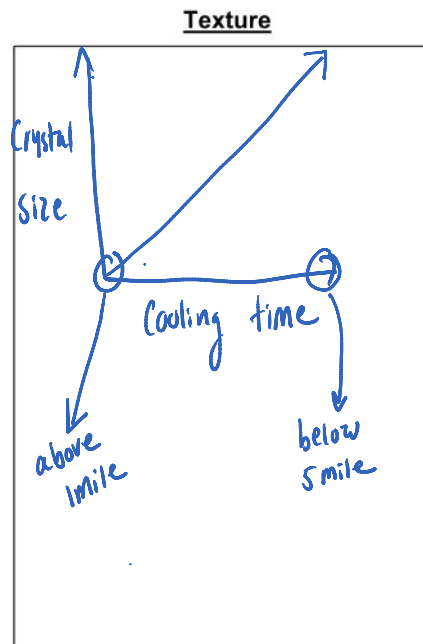

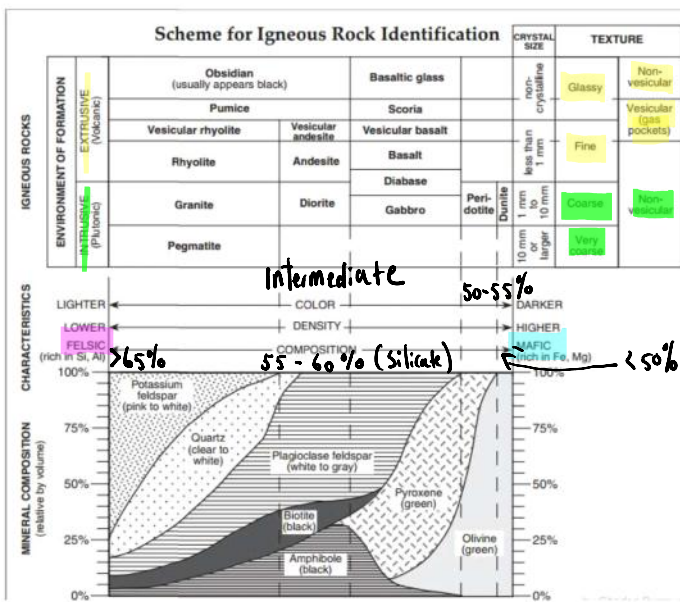

Predict the factors that would affect the observed textures?

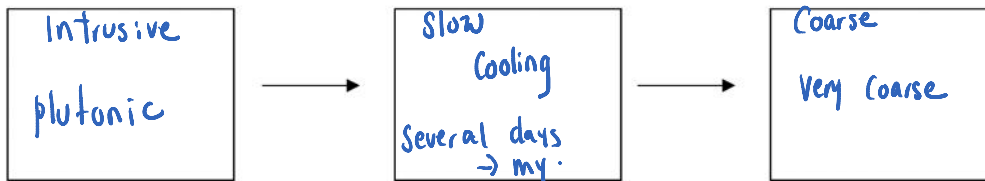

Cooling, freezing, Solidification, crystallization
time! / rate

slow cooling = large crystal texture fast cooling = small or no crystal

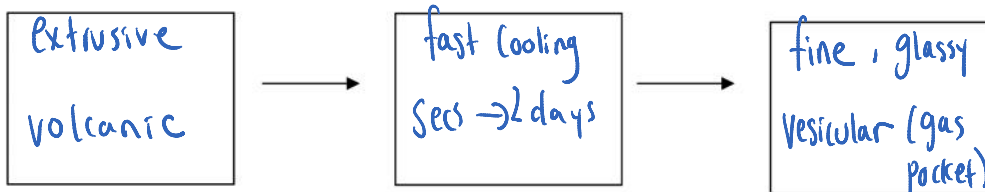

Name: _____ Date: _____

Environment#1

Environment#2

What characteristics provide evidence about the environment? texture, color
composition
