

**Rock Cycle in Earth's Crust**

□ rock type  
○ Composition  
→ Process

What do all rocks do? Weathering + erosion

**Textures from various environment of formation**

Igneous Rock		Sedimentary Rock		Metamorphic Rock	
texture	environment				
Vesicular	extrusive	cemented fragment	shoreline, highland	mineral alignment	mountain also
Interlocking Crystals	intrusive or extrusive	fossil	shoreline	Banding	subduction zone
glassy	extrusive	ripple mark	shoreline		
		layer	highland shoreline
